ABOUT TURKISH STEEL EXPORTERS' ASSOCIATION

Steel Exporters' Association is one of six associations which has been operating under the body of General Secretariat of Istanbul Mineral and Metals Exporters' Association (IMMIB).

The Association is a non-profit business organization of more than 2,000 companies representing the largest steel producers and exporters in the Turkish steel industry. It carries on its operations with the aim of increasing the export potential of the Turkish steel industry and paves the way for Turkish steel producers/exporters, with main objective to foster and attain sustainable global steel market based on free and fair trade. The Association also solves the problems of its member companies face at home and abroad, provides contact between members and foreign importers in order to ease the export processes, serves up-to-date domestic and global market news, reports and analyses.

AKCELİK IRON & STEEL

Akçelik Group was founded by board chairman Salih Kılıç in 1978 in İzmir. Always prioritizing customer demands and desires, Akçelik takes on the principle “determine the work accurately, do the accurate work”. Having maintained quality steel sales and supply for years in accordance with customer demands, Akçelik, took its place among the pioneer companies of the sector by actualizing five storage facilities in Türkiye and two different ones of those in Europe by paying strong attention to sectorial demands and company targets.

In accordance with its globalization target, Akçelik continues production with the name Akçelik Blankstahl Und Service Center GmbH after incorporating BWS Blankstahlwerk Sindorf GmbH Corporation from Germany, Kerpen into its structure in 2020.

Starting its operations with Akçelik quality and guarantee in 2020, our brand Schwert Tool Steels has been providing regular tool steel supplies that the sector needs.

Akçelik signed a new partnership with Tristar Steel from Romania with the intent of gaining know how in high added value items, and reach new and global markets. Akçelik Group - a big family with its employees, suppliers, and customers - doesn't plan the day but the future.

HOT ROLLED BARS, PEELED BARS, DRAWN BARS, GROUND BARS, FORGED BARS, ROTOFORGED BARS, CONTICAST BLOOMS, HOT ROLLED COILS, COMPLEX SUPPLY MANAGEMENT, THERMAL PROCESSING, TESTING AND INSPECTION

AKKATOĞLU IRON&STEEL

Akkatoglu Iron&Steel Company was established in Payas-Hatay, Turkey and operating since 1972. Akkatoğlu Iron and Steel are producing mainly cold drawn wire, black annealed wire, galvanized wire, barbed wire, PVC coated fence wire, hot-dip galvanized wire, construction nails, concrete nails, white&red roofing nails with caps according to international production norms.

With our strong customer portfolio, the company is also supplying steel products like reinforcement steel bar, wire rod, ribbed coil, wire mesh, Merchant Bars as black and hot-dip galvanized (Square, Round, Flat, T-bar, UPN, IPE, IPN, Eq.Angles), Transmission Mill, HRC, CR Coil, HDGC, Strips, Sheet&Plate, HDG Serrated Grated Mesh, ERW Hollow Section&Pipe, HDG Pipes, Our products are exported to several countries of the world, in addition to the domestic market.

The company has a reputable&respected name with his owner in the steel sector for the last half-decade. The company management aims at quality and customer-oriented production by providing continuous support to product research and development activities.

In addition, the company has been involved in projects in order to create sensitivity about the future of our country and our world on the social issues which he considers as "responsibility" rather than necessity and effective solution-oriented environmental policies.

BAR AND RODS, WIRE ROD, REBAR, SECTIONS, ANGLES AND PROFILE, WIRE, SEAMLESS TUBES AND PIPES, WELDED TUBES AND PIPES, COATED AND PLATED FLAT, HOT ROLLED FLAT, COLD ROLLED FLAT, NAIL, NETTING, FENCING, CLOTH AND GRILLS, STRUCTURAL STEEL, LIGHTING POLE

BMS WIRE

With its backdrop dating back to 1968, BMS WIRE was founded in Istanbul in 1999 to carry on business in the iron and steel industry. Initially starting its business by way of trade, BMS WIRE focused on the wholesale and retail of ribbed rebar. Reaching the highest trade tonnage in its history in 2011, the company proved itself with its approximately 180,000 tons/year of iron and steel trade and gained an important place in the industry. In an attempt to contribute to the country's economy further in 2012, BMS WIRE made a Galvanized Steel Wire manufacturing plant investment on an area of 20.000 m² in Kocaeli Dilovası Machinery Specialization Organized Industrial Zone and started its production activities. BMS WIRE has gained a place in the sector by producing an annual average of 20,000 tons of Galvanized Steel Wire with a single production line from 2012 to 2017 and begun to export to more than 20 countries, especially European ones. Making progress at short notice towards becoming an international company, BMS WIRE put its second production line into service in 2017 and increased its annual production capacity to approximately 60,000 tons. Focusing its attention on value-added products with the technological advantages provided by the new production line and the know-how it developed, BMS WIRE continued its activities ceaselessly between 2018 and 2021 and became one of the leading wire manufacturers in Turkey, providing raw materials to important sectors such as Energy, Agriculture, Construction, Automotive and exporting to 45 countries, mainly European, North and South American countries.

Continuing to make technological investments relentlessly, paying attention to the sustainability of R-D projects with its innovative perspective and making it a principle to put customer satisfaction first, BMS WIRE continues to be on the way towards its aim to produce the highest quality wire in Europe and become a world brand.

HOT-DIP GALVANIZED WIRE, ZN-AL COATED STEEL WIRE, STRANDED WIRE, BLACK ANNEALED WIRE

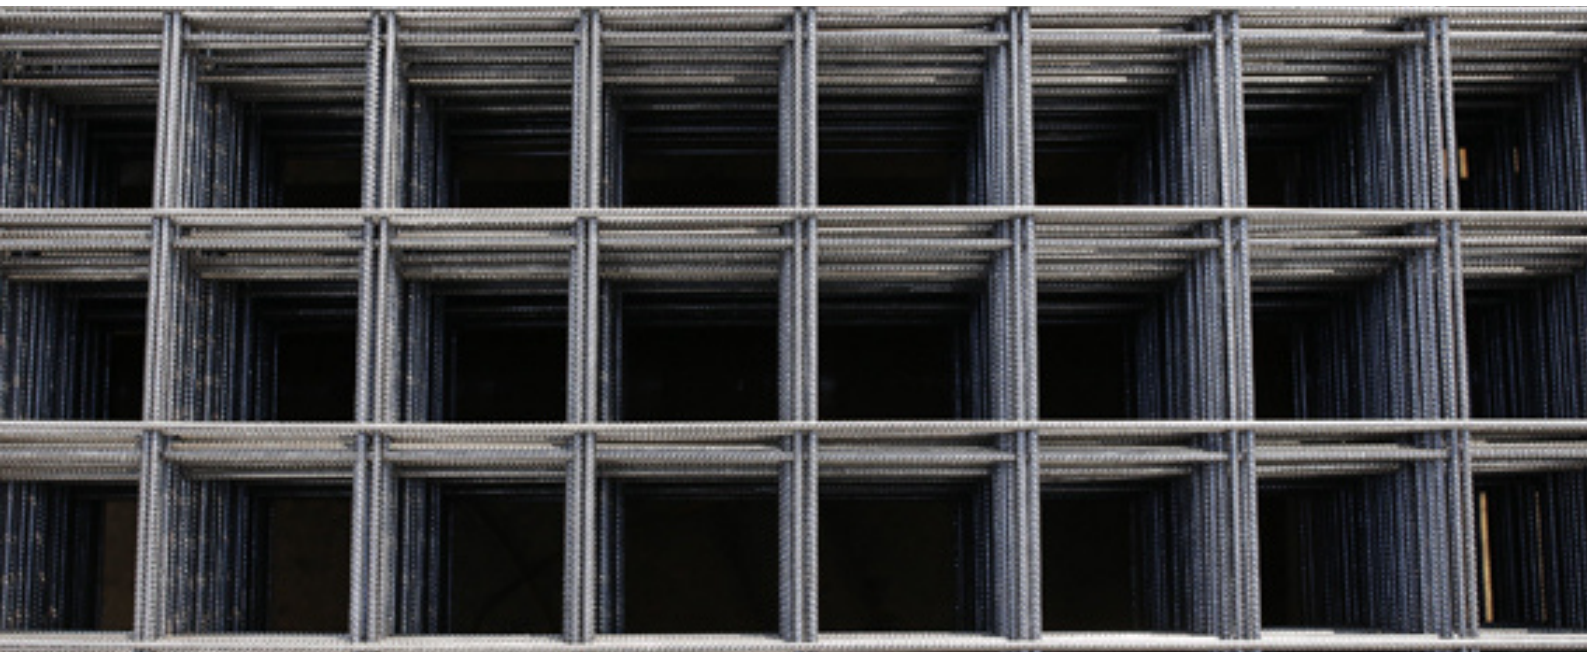

BMS STEEL WIRE MESH

Our factory, which was established in 1971 in Manisa Organized Industrial Zone, has been producing iron-steel and mesh products since 2004, and it continues on its way under the name of BMS STEEL WIRE MESH IND. AND TRADE Inc.

From the day it started production, it has been one of the leading iron and steel companies in its sector that have developed its technology, increased its capacity, and matched its quality with world standards. BMS STEEL WIRE MESH IND. AND TRADE Inc. is responsible for timely delivery with a wide range of stocks and has TSE and ISO certificates. It is engaged in the supply and sale of ribbed and flat rebar, ribbed coil, construction nail, construction wire, and all iron and steel products.

Our company, which makes domestic and foreign production without making any concessions on quality, exports to more than 50 countries on 5 continents by producing environmentally friendly and in accordance environmental legislation with international standards.

**STANDARD AND SPECIAL STEEL WIRE MESH, COLD DRAWN BARS AND COILS,
COMMERCIAL PRODUCTS**

BOSKAY METAL

Boskay Metal began to its journey in iron and steel industry with its rolling mill facility in 1990 with 5 benches rolling mills on a 7000 square meter area.

As a result of our investor and industrialist consciousness and adopted continuous development (Kaizen), we have made many investments and have become a plant that can produce high capacity flat bars, square bars, round bars, rebar with 15 benches rolling mills.

In consequence of the interest and demand from domestic and foreign markets, we focused on the new investments and product groups. In addition to this, the new rolling mill investment was started in 2017 and in 2011 the investment of second plant was completed with 15 benches. Thus, in addition to existing products, angle bars production has been started and product range has been provided. We have reached a production capacity of 150.000 tons/year on our 2 rolling mills through these investments.

200 personnel are employed in our company, the mainly part of the products are exported to abroad. Our company exports to more than 80 countries which are Morocco, Jordan, Peru, Senegal etc. Our company always keeps the quality at the ahead, a quality control laboratory equipped with spectrometer device, flow tensile tester, notch impact testers for the production of products correctly. Our experience and knowledge to be able to producing and developing our own facilities play an important role in the renewal and development of other companies in the same sector.

CETIN BOLT

ÇETİN CİVATA SANAYİ VE TİCARET A.Ş. as the main factory and the admiral ship of TECDE GROUP was established in 1976 in İstanbul, with its roots extending to year 1901 to the founder's and owner's family's first generation when the family had started the fastener business almost 120 years ago. ÇETİN CİVATA SAN. VE TİC. A.Ş. is today one of the biggest producers of cold forged steel bolts, screws and fasteners in Turkey and a totally integrated factory, having a production range of fasteners from M3 to M27 and lengths up to 230 mm in all standard items and customer's drawing items and having all processes in-house starting from the preparation of raw material wire rods which means the wire drawing+annealing up to cold forging/cold heading and afterwards till thread rolling, heat treatment, surface coating and finally till the sorting-logistic operations which are all done under Cetin Civata production premises. ÇETİN CİVATA has the capability to design and to manufacture all necessary moulds, toolings and tool sets in its own tool shop facilities in the factory which gives a big advantage and flexibility to CETIN CIVATA in customer drawing fasteners production and in special items markets. ÇETİN CİVATA, including the Group's 4 production facilities and 2 marketing companies employs more than 800 staff, has 140,000 sqm total production area and over 60,000 sqm covered area and exports 60 % of its turnover to more than 40 countries in the world. The main factory has a very young machine inventory of more than 120 first class multi-station cold forging machines, combined cold headers, thread rollers, tapping-pointing and open-die tooling machines. Together with the Group factories, the consolidated number of cold headers is 180 and the total forging capacity is over 80,000 tons which will be going to reach 100,000 tons in the next 3 years after the continuing capacity and machinery investments will be completed. The factory also has 4 heat treatment lines which are running as per CQI – 9 regulations for serving its wide range of high tensile products clients. Çetin Civata is able to offer and to apply all types of surface coatings against corrosion and is one of licenced coaters of Dörken and Magni coating brands in Turkey. ÇETİN CİVATA has all the required process management and quality management certifications such as IATF16949, EN ISO 9001, OHSAS 18001, ISO 14001, ISO / IEC 27001 and the conformity certificate of structural bolting assemblies as per EN 14399 and EN 15048 and sells 40 % of its' products to automotive industry, 25% to white goods industry, 15% to various construction related fields and the rest is sold to the wholesaler market.

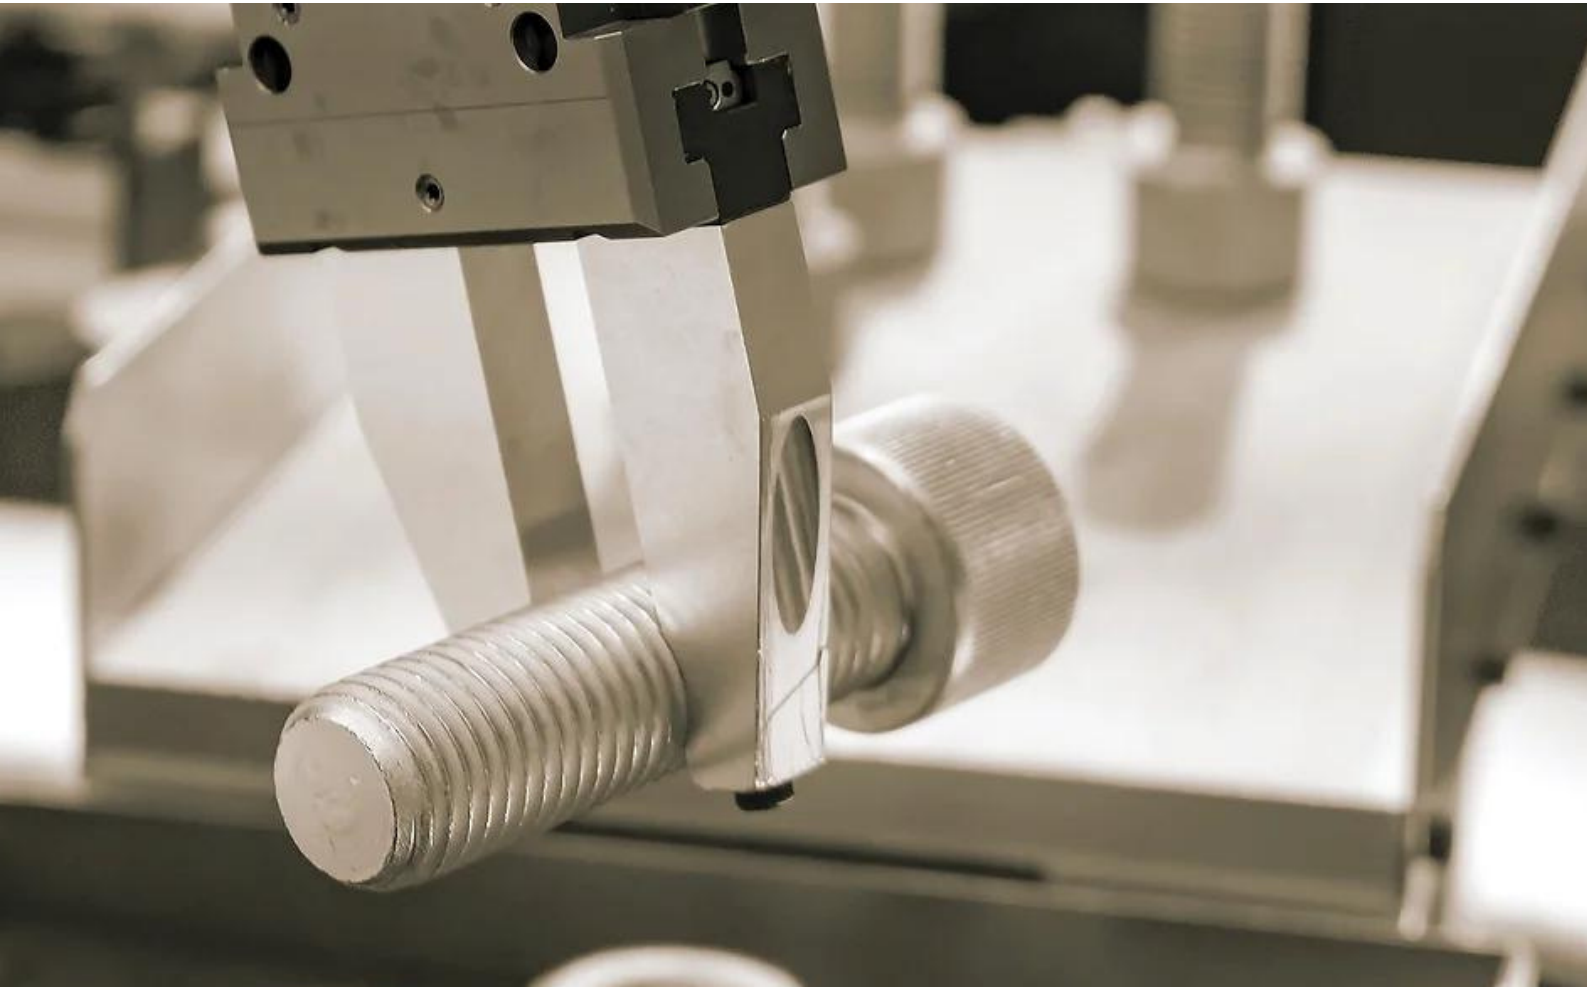

STANDARD BOLTS, CUSTOMER DRAWING BOLTS AND SCREWS, STANDARD AND SPECIAL NUTS, RIVETS, THREADED RODS, CHIPBOARD SCREWS, SELF-DRILLING SCREWS, TAPPING SCREWS, SPECIAL MALE PARTS, HIGH-TENSILE PARTS, SOCKET HEAD, FLANGE HEAD ITEMS .

CIVTEC BOLT

Our company has been one of the leading manufacturers and global marketing company for bolts, screws, and nuts in Istanbul-Turkey since 1915. Our Company has the advantages of mould production, coating, with a storage capacity of 30.000 ton and has ability to produce all kind of special fasteners along with special coating facilities like MAGNI, GEOMET, HDG etc. The quality certificates, which we have are DIN EN ISO 9001-2000, CE, ISO/TS 16949:2002, ISO 14001 and OHSAS

**BOLT, NUTS, SCREWS, ANCHORS, THREADED RODS, STAINLESS STEEL (INOX),
WASHER, RIVET AND RIVET NUTS, OTHER FASTENERS**

EKİNCİLER HOLDING

In Turkey, the private sector saw a rapid growth in the 1950's and sustained its growth at a faster pace in the 1960's, the decade when the first seeds of Ekinciler Group were planted. Ali Ekinci (1926-1988), a former tradesman, realized the importance of iron and steel industry for the national development efforts and he decided to lay his hands on the industrial production.

When Orhan Ekinci (1945-1989) became the president, the group made a huge leap forward. Following Ali Ekinci's footsteps, Orhan Ekinci led the company to the route of rapid growth.

In 1970's, the group built a rolling mill in Karabük. Foreign trade and international transportation operations were also started in the same decade. Following this rapid growth, Ekinciler Holding was incorporated in 1986. Ekinciler Holding focused mainly on exporting goods in the 80's. Ekdemir Iron and Steel Plant was established in İskenderun in this decade. Financial services, sea and land transportation, and construction works were the main business activities in the 1990's. The 90's were the decade when Ekinciler Holding adopted and started practicing the total quality approach. A general reorganization effort started following this initiative.

In our globalized world, Ekinciler Holding proficiently keeps up with the tough competition, managing its growth without losing its focus on quality, adding value to society and contributing to the national economy. A leader in construction and contract services, maritime industry, investment and securities, stock brokerage, and iron and steel sector, Ekinciler Holding runs toward a better future with steady strides, leaning on and improving the heritage of its founders.

BILLET, REBAR

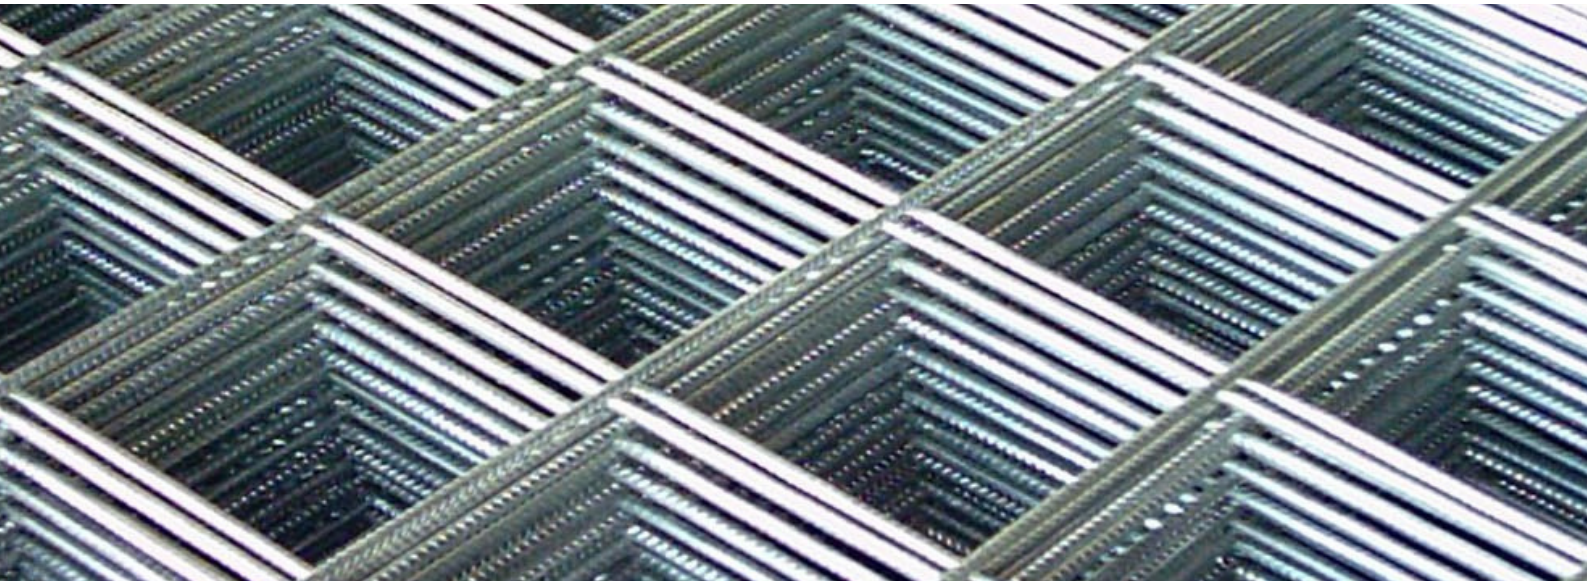

ERSOYLAR STEEL

ERSOYLAR METAL, the leading Wire Mesh manufacturer in Turkey, was established in 1992. Wire mesh products of our company are offered both on the domestic and foreign markets under the brand of ERSOYLAR METAL and ERSOYLAR WIRE MESH. The company is located in Osmaniye Organized Industrial Zone, it enjoys a strategic geographical position, close to Iskenderun Port. With our 2nd recently established factory in Karabük in the Black Sea region, the area out of total 30.000 m2 area, total production capacity of our company will reach 150,000 metric tons/year, which makes 'Ersoylar Metal' the leading Welded wire mesh manufacturer in Turkey. Our company is exporting steel products from Turkey to 45 countries with core markets in the Americas, Africa and Europe.

At Ersoylar, quality is an absolute top priority; we test our products every day according to requirements that we must observe. Apart from manufacturing, the company is also dealing with the trade of reinforcing steel bars, wire and wire rods supplying to leading private and public industrial companies.

Our company, holding the ISO certificate, produces both wire products and wire mesh under the quality standards of BS EN ISO 9001 certificate.

WIRE ROD, REBAR, WIRE, WIRE MESH

FERİNEKS STEEL

Ferineks started its operations in Gebze for the first time in 2007 with a slitting line with an annual capacity of 100,000 tons and a cut-to-length line with an annual capacity of 50,000 tons, with the goal of "to be among the companies that provide the fastest service in Turkey's steel service market" in the field of Iron and Steel. Today, it continues to serve its customers with a total production capacity of 300,000 tons/year, with slitting lines with an annual capacity of 200,000 tons and cut-to-length lines with a capacity of 100,000 tons.

The mission of Ferineks is to fulfill the expectations by providing the fastest response to customer demands in the Iron and Steel industry, which has an important place in our country and in the world.

Ferineks serves end users in many sectors. These sectors include automotive, white goods and spare parts, construction and sub-industry, machinery and spare parts, radiators, lighting, heating, ventilation, gaskets, cable and transport systems, electrical panel manufacturers.

HOT & COLD DRAWN FLAT ROLLED PRODUCTS

GAZI METAL

GAZI METAL (Est. 1987) is a Turkish steel company producing cold rolled coils (CRC) and hot rolled pickled and oiled (HR P&O) coils in its Karasu Mill in the city Sakarya of Turkey. The company also serves as a steel service center to supply cut-to-length sheets and slit strips.

GAZI METAL produces the following flat steel products: Cold rolled steel coils, cut -to-length sheets and slit strips (0,28 – 2,50 mm thickness, max. 1524 mm width) and Hot rolled pickled & oiled coils, cut -to-length sheets and slit strips (1,5 – 6,0 mm thickness, max. 1524 mm width)

COLD ROLLED FLAT, HOT ROLLED FLAT, HOT ROLLED PICKLED AND OILED COILS

ISIK STEEL

Founded in 1965, we, ISIK STEEL INDUSTRY & TRADE CO., INC. , is one of the oldest steel manufacturers in TURKEY, specialized in the production of HOT ROLLED STEEL MERCHANT BARS; STEEL EQUAL ANGLES, FLAT BARS, SQUARE BARS AND ROUND BARS, HAMMERED SQUARE AND FLAT BARS, GALVANIZED MERCHANT BARS, U CHANNELS, I BEAMS, H BEAMS.

Our company has a steel mill with the 150.000 metric tons annual production capacity in KARABUK, where is located in Black Sea region of TURKEY. Our 55 -year- production experience, manufacturing well-assorted products with various steel grades and international standards provide us high market reputation as well competitiveness upon other steel manufacturers in Turkey.

ISIK STEEL INDUSTRY & TRADE CO., INC., has been awarded with 3rd place in “ STARS OF STEEL EXPORT AWARDS 2018 ” for “ MOST EXPORT GROWTH ” category which is organised by TURKISH STEEL EXPORTERS’ ASSOCIATION. Also with its export sales performance in 2019, our company became one of the “TOP 50 TURKISH STEEL EXPORT COMPANIES”

SECTIONS, ANGLES AND PROFILE, HOT ROLLED FLAT, COLD ROLLED FLAT

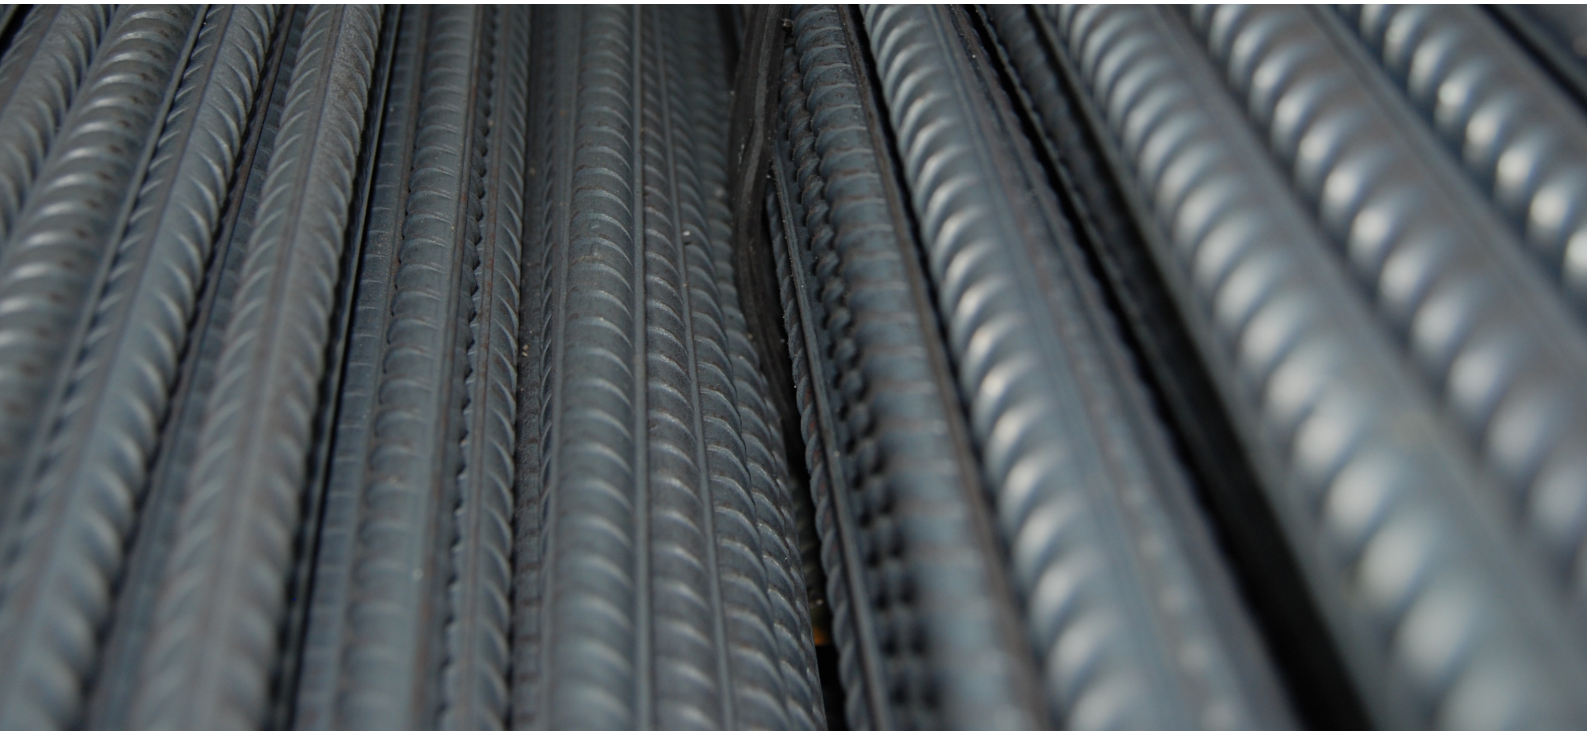

İCDAS STEEL

Since 1970, we are among the top steel producers in our country in the steel production. We are one of the biggest producers of steel among the largest private sector steel producers with regard to our production capacity. We maintain our top rank in the export listing prepared in the sectoral basis each year. In addition to steel production, which is our main field of operation, we conduct our activities in the fields of energy, shipyards, logistics (sea, land), transportation (air), port management, ship management, construction, insurance, mining, agriculture and animal husbandry with the same precision.

Our Değirmencik Integrated Plant in Biga, Çanakkale features three steel plants with a capacity of 4,5 million tons/year and four rolling mills with a capacity of 4 million tons/year. As to capacity, the biggest construction steel processing rolling mill of our country is in our plant with 1.9 million tons/year. Of our two shipyards, Aksaz Shipyard (dry pool) have been operationalized in 2020, and is the first and only shipyard which has the capacity to manufacture an aircraft carrier in our country. Three-unit 405 mW thermal power plant, four HPP, one SPP, two piers, two dock are among the largest private sector port facilities in Turkey with a daily loading capacity of 30,000 tons and offloading capacity of 60,000 tons. And the auxiliary facilities of these units are included. In addition to the Değirmencik integrated plant, our two-unit power plant with a capacity of 1,236 megawatts in the Bekirli village connected to Biga, and our wind power plant with a licensed installed power of 60 megawatts and our seed bank with a capacity of four hundred thousand tons in Biga are in operation.

BILLET, WIRE ROD, REBAR

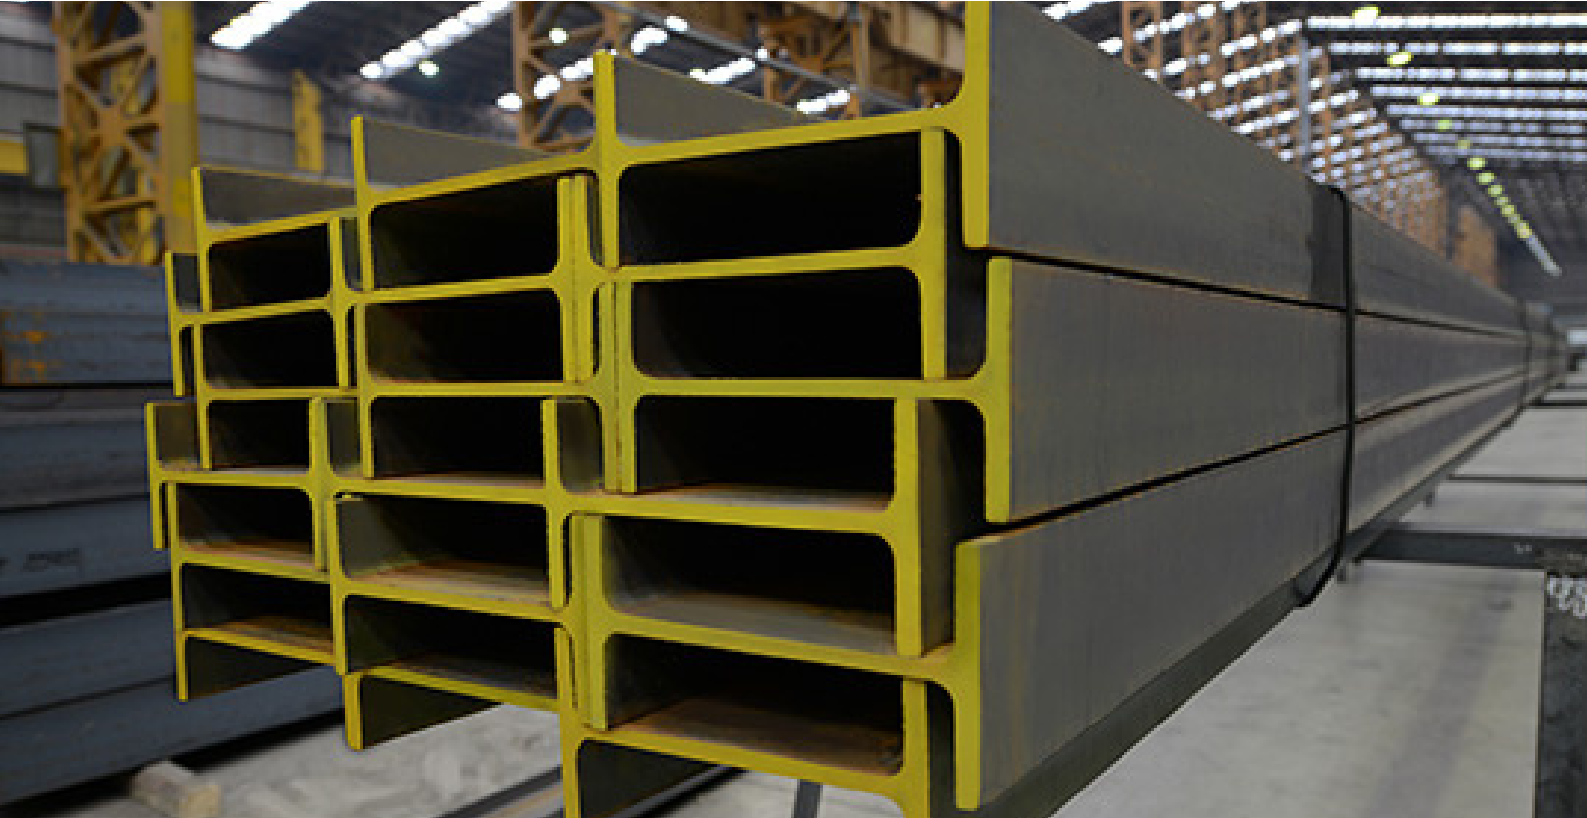

KROMAN STEEL

Having been operating in the steel and pipe industry since 1950's, Yucel Group is a group of companies offering the widest range of products in the Turkish steel industry with its 8 incorporated companies, 5 manufacturing plants, a self-owned port and a manpower of 3.500 employees.

Kroman Celik Sanayii A.S. was incorporated in 1966 with the aim of manufacturing and dealing in the Iron and Steel products. Kroman Celik joined Yucel Group of Companies in 1985 and has, since then, been continuing its manufacturing activities in the city of Kocaeli, district of Darica with an indoor area of 325.000sqm and outdoor area of 150.000sqm.

Kroman Celik carries on its activities with an environmentally conscious sense of manufacturing at its modern facilities with a capacity of "1,4 million" tons of molten steel, "1,8 million" tons of rebar, wire rod and spooler rolling and "150 thousand" tons of section rolling per year and with its manpower of 1.450 employees within the framework of recycling of iron and steel scraps.

BILLET, BAR AND RODS, WIRE ROD, REBAR, SECTIONS, ANGLES AND PROFILE

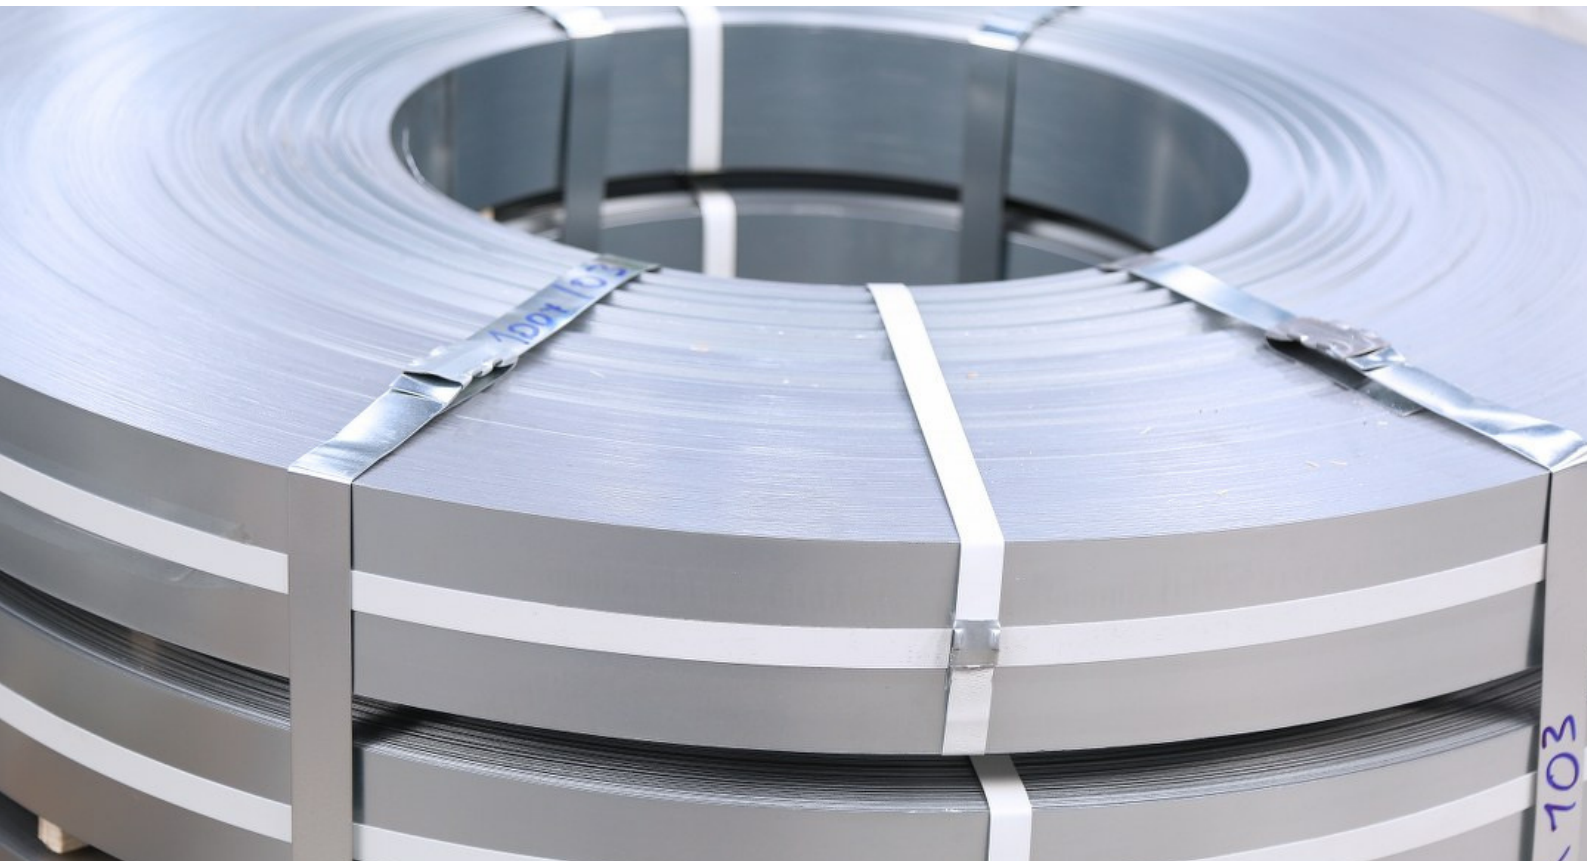

MADES METAL

Our company, which serves in the iron and steel sector as Madeş Metal San Tic Ltd Şti, was established in 1978. The founder of the company is Yusuf Vural, who is currently the general manager of the company. Madeş Metal continues its activities in its facility in Dilovası Makine OSB, built on 20000 m2, where it completed its investment in 2019. The company has an active steel service center with an annual capacity of 200000 tons and a recycling facility with a capacity of 60000 tons.

Within the steel service center, there are HDG, PPGI, HR, HRP, CR product sales Slitting, Cut-to-Length, trapezoidal, gutter, roller shutter, ridge production lines. High quality and customer satisfaction oriented working approach and investments made within this framework are our most basic principles to provide a better quality service to our valued customers day by day.

COATED AND PLATED FLAT, HOT ROLLED FLAT, COLD ROLLED FLAT

MERTSOM NUT

Mertsom is one of the Turkey's leading tai-lor-made nut manufacturers and exporting more than 15 (mainly EU) countries all over the world.

The product range varies from M4 up to M22. Mertsom is well-known with high quality produc-tion, flexibility through integrated manufacturing.

Mertsom produces wide variety of products mainly to automotive, white goods, construction, agriculture. It has production in one site (Istan-bul). Mertsom could produce both standardized and special cold formed fasteners like nuts, bush-es. Production capacity is increasing day by day; currently 5 million pieces are being produced daily. Mertsom can do all production process-es in-house, which brings flexibility in terms of timing and cost. (Sorting, secondary operations, heat treatment etc.) In addition, several coatings could be applied like Dörken, Magni, MacDermid, Coventya, 3M, Nylok and Omnimask

NUT, BUSHES, SPACERS, SPECIAL FEMALE PARTS

NIKEL STAINLESS STEEL

Nikel Paslanmaz Çelik was established on 1990 as importer, exporter and stockist of flat stainless steel and invested for sheet processing machines to respond demand of domestic and international stainless steel market.

Today, Nikel Paslanmaz, is 2nd largest stainless steel exporter of Turkey and ranked in first 400 biggest companies of Turkey.

Nikel Paslanmaz Çelik exports to 59 countries and fulfill all requirements of Turkish stainless steel markets thanks to 4 CTL, 3 slitting lines, coil-to-coil brushing and grinding line, 2 sheet-to-sheet brushing and grinding lines, 8K mirror polishing line, 2 circle pattern lines, 2 tear drop pattern line, welded tube production and surface processing lines installed on 7000+20000 sqm mills along with ferritic, austenitic and duplex grade flats (sheet, coil), and long (pipe, tube and bar) stocks exceeding 10.000 tons in-house stock which can be processed according Customer specifications. Nikel Paslanmaz Çelik san ve tic A.Ş. has a 12.000 tons/month flat stainless steel processing capacity and target to be a key player for stainless steel welded tube manufacturer.

WELDED TUBES AND PIPES, HOT ROLLED FLAT, COLD ROLLED FLAT**

SERHAT IRON & STEEL

Serhat iron and steel headquartered in ankara has succeeded to be one of the pioneer institutions in the steel production sector since 1987.

The company's total capacity at karabuk mill has reached 12.000 metric tons per month and 150.000 metric tons per year. Apart from that group companies realize 250.000 metric tons sales annually. All iron & steel products are produced in accordance with the international quality standards

Serhat iron and steel imports with its expert staff, for the aim of supplying the needs of raw material of the firm, and exports over 50 countries with the increasing production capacity every year.

FLAT BARS, ROUND BARS, SQUARE BARS, EQUAL ANGLES, UPN, UAC

TAT METAL

Tatmetal produces hot rolled pickled, cold-rolled, galvanized and prepainted flat steel through the Tatçelik brand as one of Turkey's leading flat steel producers. Automotive, White Goods, Construction, Energy and Machinery-Equipment are the leading industries Tatmetal serves. As a global player in the sector, Tatmetal exports to more than 70 countries in 6 continents and it is ranked 54th among the first 500 largest industrial companies in Turkey.

COATED AND PLATED FLAT

TEKIN PIPE

Tekin Boru produces steel pipes in its production facility located in Dörtöyl district of Hatay around Iskenderun Bay.

The dimensions of the pipes produced in Tekin Boru production facilities in accordance with national and international standards vary depending on the customer's request:

- 219 mm - 3048 mm diameter
- 3 mm - 25 mm wall thickness
- 4 meters - 40 meters in length

The steel pipes produced are protected against corrosion through coating methods such as polyethylene, epoxy, concrete and bitumen.

Tekin Boru carries out the inspections and tests required by national and international standards using its own machinery, apparatus and equipment. It tests the chemical and physical properties of the products in its own laboratory. It provides added value to the country's economy by exporting to more than 30 countries, especially Central Asia, Europe and Africa. Tekin Boru shares the advantages of the region where it is located with its customers in the form of logistics and delivery time.

WELDED TUBES AND PIPES

YAMETAS STEEL

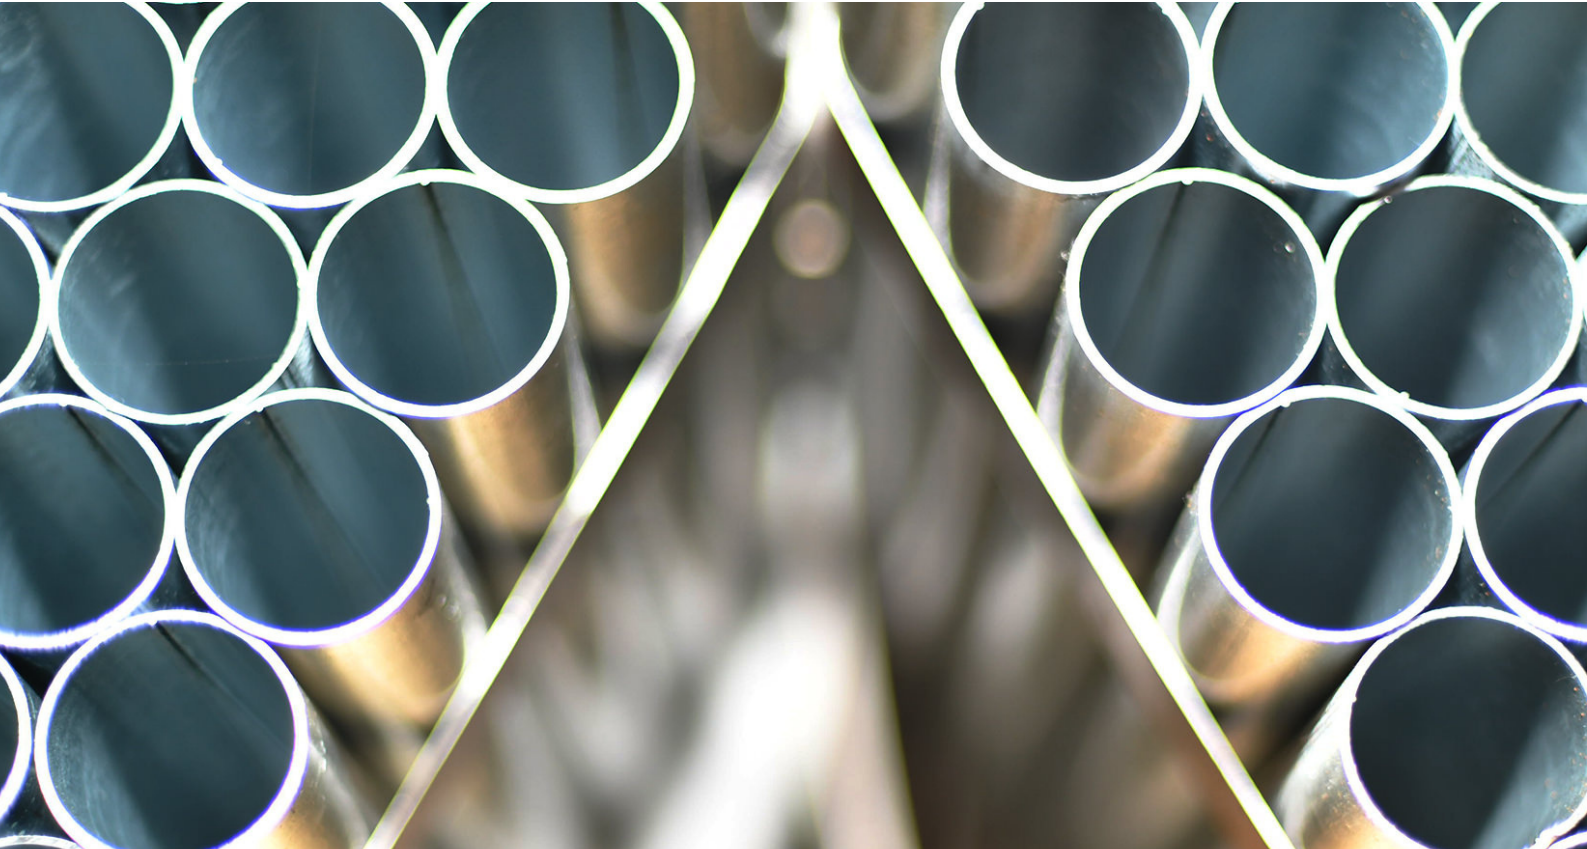

Yametaş , one of the leading companies in the Turkish steel industry, continues its activities with the principles of responsibility given by its experience of more than half a century.

Since it was established in 1966, Yametaş has consistently improved itself as a follower of all innovations and developments with its dynamism. Yametaş gives particular importance to sense of high quality and customer satisfaction in all contexts.

At its production facilities located on a land of 30.000 m², Yametaş has Steel Service Center and Tube & Profile & Roll-Forming lines which meet the needs of many sectors in both domestic and foreign markets.

Our biggest goal is to maintain a long term partnership with our precious customers through our experienced, customer-oriented and skilled staff for "Serving the STEEL industry".
